Spring System	8 gauge standard sinuous heat-tempered springs. Anchors the system to frame preventing spring sway and distributes weight equally.	9 gauge heat-tempered coils with coated stabilizer wires are built into every frame and finished with a synthetic webbing sheet. Our best spring system enhances comfort, preserves shape and most evenly distributes weight. This construction prevents sway, and assists in higher load distribution to create maximum stability.	8 gauge standard sinuous heat-tempered springs. Seat Cushions	CertiPUR-US® medium density soy-based polyfoam with fibre wrap. Soy bean oil reduces negative impact on the environment while offering the same consistency and durability as full petroleum oil products.	CertiPUR-US® high density, premium soy-based polyfoam with luxury feather blend wrap. Feather wrapped cushions are a full shape that conforms to your body and allows you to sink down into your cushions for a relaxed and cozy experience. High density foam provides outstanding compression recovery with superior comfort and support.
